

Stellar Wallet & SDEX

**Simple. Secure.
Stellar.**

Manage money in
a new way

Not custodian.
Only **you control**
your funds.

Stellar. Borderless. Limitless. Powerful.

Stellar is an open network for storing and moving money.

Stellar makes it possible to create, send, and trade digital representations of all forms of money: dollars, pesos, bitcoin, pretty much anything. It's designed so all the world's financial systems can work together on a single network.

Transaction speed 2-5 sec. Transaction price ≈ \$0.0001.

Reliable user-friendly & secure Stellar Wallet

Secret keys

Only the user owns the private key and has access to the funds. Nobody, except himself, can influence the account.

No personal data

Create your Stellar account in 1 minute without collecting personal data.

No registration by email

No barriers or risks. Scopuly does not store user emails in its database.

Multi-account

Simultaneous connection of an unlimited number of Stellar accounts.

Wallet Features

All the most advanced blockchain services in one wallet.
Scopuly opens the door to the world of decentralized economy on Stellar.

	Multi-signatures		Block Explorer		Fast and cheap transactions

In progress

	Crypto/Fiat Exchange		Staking & AMM		Academy
	Asset Swap		Stellar Anchors		Stellar Launchpad
	Wallet extension		Crypto Cards		Crypto License

What Wallet can do

Scopuly is the perfect way to buy, store, invest, trade, pay, earn, issue and transfer crypto assets. Built on Stellar.

Payments

Make multicurrency instant payments worldwide with no fees. Create and pay invoices by QR code. Fast, easy, cross-border and secure.

Investments

Benefit from short-term or long-term investments in promising startups and tokens. It has never been easier to start investing.

Trade & Swap

Trade any Stellar tokens directly from your wallet with no fees, no limits. Or issue your tokens on SDEX. Tokens, Stocks, NFTs, whatever.

Buy/Sell Crypto

Buy and Sell crypto assets (XLM and other Stellar tokens) for fiat money directly from your wallet.

Earn Crypto

Earn crypto assets on Staking and AMM. Scopuly gives you access to DeFi services in the Stellar ecosystem.

Gifts & Bonuses

Receive awards from members of the Stellar network. And also get gifts and bonuses in the SCOP service token.

Services

Save asset value in USDC stablecoin

- Protect your assets from volatility, be it crypto or fiat money, with the **USDC** stablecoin.

- ✓ When the crypto market crashes or the economy of a country collapses, the best way to keep your savings is to go into a stablecoin such as the **USDC**.
- ✓ With the help of stablecoin, it is easy to make settlements and payments for goods and services, since all participants in the transaction know that their asset is always at the same price level.
- ✓ New decentralized economy in your device.

Payments have never been so easy and free

- ✓ In addition to direct payments on the Stellar network, we have also implemented multicurrency **QR Payment Request** using Stellar's **PathPayment** technology.
- ✓ When a person scans a QR Payment Request (**SEP-007**), he can pay this invoice not only with the tokens indicated in the invoice, but also with any other tokens that are on his wallet.
- ✓ All the magic of multicurrency payments is done by PathPayment. Assets are converted through the current orderbook for the asset specified in the payment at the best price.

Trade & Swap any asset on Stellar

- ✓ On Scopuly, you trade directly with other traders. There is no one in the middle. You are always in sole control of your assets. No fees.
- ✓ We've created one of the most powerful user interfaces for Stellar DEX. It lists all Stellar assets. Listing tokens on **Stellar DEX** is completely free.
- ✓ Connect as many accounts as you like for more professional trading. Your time is valuable to spend on re-authorizing many of your Stellar accounts. Connect all your accounts to one interface.

High security and privacy guarantee

You can attack the database, but you cannot penetrate the local memory of your browser or other device.

Scopuly does not store user private keys in any database. Therefore, there is nothing to attack. Only you and no one else have the secret key. No one can stop you from making transactions.

For maximum security, connect your Stellar wallet to the Scopuly web app using the wallet browser extension: **Albedo**, **Freighter**, **Rabet**.

Your wallet is now with you all over the world

Cash is no longer needed. Transfer fiat money to a stablecoin such as USDC, get a Scopuly crypto card and pay at any store wherever you are.

Pay in any currency worldwide with no fees. Create and pay invoices by QR code. Trade assets on SDEX with no fees.

All of this is in your phone, in your pocket, closer than you think.
